STARTS

Label Connections launch PCL3 Digital™ Range

Label Connections announce the launch of the all-new PCL3 Digital™ range. PCL3 Digital™ is a range of self adhesive sheets; size SRA3, produced either as flat sheet or die-cut labels.

The current range consists of 11 base materials and 18 label sizes (including all standards and specials such as DVD, CD and wine bottle labels.)

PCL3 Digital™ labels follow the proven PCL™ label formats. All PCL Digital™ and PCL™ label formats can be downloaded as PDF files from the Label Connections website at www.pcllabels.com

The PCL3™ Digital range is approved by The Digital Academy as compatible with hp Indigo Series 3000 sheet-fed presses. The range has passed their hp Indigo Substrate Compatibility Test and Approval. (Approval number: DA3-04-099) This gives hp Indigo press owners the confidence that any Digital Academy approved substrate will run through hp Indigo presses without problems and will give the best possible print result. PCL3 Digital labels are approved for Indigo printing, without any further treatment. To date, this is the only range of die-cut ranges in the world to carry approval. For full details of The Digital Academy's comprehensive testing process visit their website at www.digitalacademy.com

The PCL3 Digital™ range is stocked in the UK by Robert Horne Paper and Antalis.

For further information please phone Label Connections on 01480 211222.
