

Product Specification

Gloss White POLYESTER (IDP) Permanent

Description **Gloss White Polyester (IDP)**
Gloss white polyester base film, top coated for litho, laser and indigo printing.

Adhesive **PERMANENT** acrylic emulsion.
Waterproof adhesive specifically designed for safe use in hot fusing laser printers.

Minimum Application temperature: +5°C
Service temperature: 0°C to +50°C.

Backing Polyester film for exceptional stability and flatness.

Printing Information

Litho: Use fully oxidising inks for polyester films. Remove all traces of oil based inks and varnishes from ducts. Wherever possible print all colours in one pass eg 4 colour press for 4 colour job. Run press as dry as possible and do not use dissolvable spray powder as it will retard drying. If problems obtaining suitable inks contact PJF Printing Inks 01933 271201 quoting PCL polyester as the base material.

Laser: Excellent laser printing qualities - including high speed machines.
Always fan sheets well before printing to reduce 'static' cling. Set paper type as 'heavy weight'.

Copier: See laser.
Ink Jet: Not suitable.

Indigo: Approved for HP Indigo printing.

General: This product is designed for long term permanence and does not biodegrade

Availability

Available in ranges: **PCL3 Digital®**
A3

also available in sheets 320 x 460mm (SRA3+)
