

Product Specification

Description **Matt White (IDP) PE**
Matt white polyethylene film specifically coated and stabilised for high temperature laser printing.
Material is waterproof and offers a long-life alternative to paper labels.

Adhesive Available adhesives: PERMANENT (marine grade)
Approved for hazardous drum labelling

Backing High density white kraft for flatness and stability.

Printing Information

Litho: Use fully oxidising inks for polyester films. Remove all traces of oil based inks and varnishes from ducts. Wherever possible print all colours in one pass eg 4 colour press for 4 colour job. Run press as dry as possible and do not use dissolvable spray powder as it will retard drying. If problems obtaining suitable inks contact PJF Printing Inks 01933 271201.

Laser: Excellent laser printing qualities - including high speed machines.
Always fan sheets well before printing to reduce 'static' cling. Set paper type as 'heavy weight'.

Copier: See laser.

Ink Jet: Yes - no special inks required - WATERPROOF print achieved.

Indigo: Indigo printable

General: Excellent, durable, waterproof grade for harsh environments.
