

Product Specification

Matt White PE ONLY

Adhesive

Permanent - marine grade.

UV Acrylic permanent.

Complies with BS5609 part 2

hazardous goods labelling - resistance to sea water.

Minimum application temperature: 0°C

Temperature range: -30°C to +70°C

Tack: Very high

Final adhesion: Extremely high.

Excellent for use on critical surfaces such as cardboard and ampoules.

The adhesive is highly water resistant and is suitable for labelling cold and humid surfaces.

Excellent for applications where durability and water resistance is required e.g. hazardous drum labelling.

Regulations

Contact with food

Approved for indirect food contact and direct contact on dry and moist non-fatty foods.

(FDA 21 CFR 175.105 (adhesives))

Toy Safety

The adhesive conforms to the EN71-3 (Toy Safety) Regulations and Packaging (Essential Requirements) Regulations.

Heavy Metals

No heavy metals are used in the manufacturing process and typical contents are less than 1ppm.

The use of self adhesive labels on leather, suede, silk, satin (and other such fabrics) furniture e.g. polished wood and any surface containing natural oils should be avoided. The end user must satisfy themselves that the product is suitable for the required use - please request samples

Warranty:

Information and recommendations are based on our most up to date knowledge and experience. As the products are used outside our control we cannot take any responsibility for any damage which may be caused when using the product.

The product information should be used as a guide only - please request samples for testing if unsure of any aspect of the application or print process compatibility.

This information sheet replaces all earlier ones. All information subject to change without notice.
